Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7, 8 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, it is taught "melting point over 80 degrees C, preferably over 10 degrees C". Such ranges are incompatible, thus the scope of the claim is not clear. Dependent claims fall herewith.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4, 10, 11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dobson Jr. (5783527).

Dobson teaches a well drilling or servicing fluid which comprises a hydrophobically modified starch or cellulose, and may comprise a hydrophobic bridging agent, such as a wax or resin which are oil soluble (column 6, lines 1-29). The starch used may be crosslinked as in the present claim 13 (see example 5 and column 6, lines

Art Unit: 1712

1-7). Dobson differs from the present invention in that a specific example of the combination of the hydrophobically modified starch or cellulose, and the hydrophobic bridging agent is not disclosed. It would however be obvious to one of ordinary skill in the art to utilize the hydrophobic bridging agent of wax or resin as taught by Dobson, in combination with the hydrophobically modified starch or cellulose, given the teaching of Dobson that such combination is useful for forming well drilling and servicing fluids. The use of the fluids of Dobson in fracturing and gravel packing would be obvious to one of ordinary skill in the art, given the teaching of Dobson that such fluids are useful in well servicing operations.

5. Claims 5, 6, 12 and 14 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

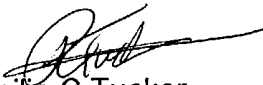

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C Tucker whose telephone number is 571-272-1095. The examiner can normally be reached on Monday - Friday, Flexible schedule.
